LUSIONMENT.

Dr Langwell chose one artest hotels for dinner.

It happened to be the same one in which Nancy and Gerry had had their last dinner alone before the latter left for Peru.

In spite of herself and her unde nlable interest in the clever surgeon, she could not crowd out recol. jections of that other evening. Time after time her mind wandered from the doctor's conversation and returned to that last real talk she had had with Gerry.

Instead of the smiling complacent face opposite her with its touch of sensuality and a trace of cruelty in its heavy-lidded eyes, she say Gerry's strong, lean, brown face.

So definite was the vision that she almost stretched out her hand to it. She wanted Gerry—Gerry who was half-way across the world. She wanted to hear his voice, to feel the comfort of his presence. She knew suddenly that she was weary at playing the game.

A question from the doctor brought her back from her dreaming with a start. hadn't the faintest idea of

He wasn't a particularly good dancer, she realized instantly and he insisted upon humming under his breath, a bit off key, the tune the orchestra was playing.

She realized that taken away from his environment the clever surgeon became only a mildly interesting escort. Three times around the floor and Nancy was exhausted. She was usually an indefatigable dancer, but

It was necessary to summon the "captain;" several trips had to be

made to the cashier's desk.

Nancy was very bored and a little
resentful about the whole proceeding. Gerry had never been fussy about such small amounts as ten cents. Indeed, she couldn't recall Gerry ever adding up a check. She was quite sure Major Desmond had never done such a thing in his life. She found herself contemplating the remainder of the evening with the air of a martyr.

## Pupils to Work In Southeast

(By Marion L. Barrett, aged 13, Ketcham School.)

Students of the Ketcham School, of Anacostia, have finally secured a lot on which to have a garden. We have for many years been trying to get a lot but have never succeeded until this year.

As soon as we secured the lot we started to prepare the ground. One boy got a horse and another a plow. Boys from the sixth grade cleared the lot and those from the eighth started the plow-

They soon found, however, that the work was too hard for the animal, who was unaccustomed to plowing. Our nature teacher. Miss Hickock, then got a man to plow the field for \$5, and each child brought 10 cents to pay for the work. The lot is 129 by 143 feet, and

each worker will receive a plot of 10 by 18 and two-thirds feet. The school will furnish the seeds. The yield from the individual plots are to go to the children who work them and the space that is left over is to be worked for the school, with the money derived from the products of this to be put into the school treasury. We expect to have a pros-

"Do you think any harm can come of such a beautiful love?" she asks.

"Do you think any good can come of it?" I would ask her in re-

Leaving out of the question the wrong that a woman does her sister-woman when she encourages her husband to be faithless to hey, and the irreparable injury she does to the children whose father she takes away from them—for no man can away from them—for no man can do his duty as a father and be a philanderer at the same time—let us consider the case of the girl alone. She will say love. True. But she gets the lees in the bottom of the

It sulks behind closed doors and at clandestine meetings at shabby restaurants, and taking from every kiss its sweetness, is the knowledge that one is not playing the game, that one is not sporting. that in the background there is helpless woman who is being robbed without being given a chance to defend herself.

The woman who has a love affair with a married man must perforce endure such agonies of jealousy as are almost punishment enough for her folly and sin. She sees another sear the she loves, and occupy the social position that he gives her. She knows that the man who tells her he loves her would not ask her to his house, introduce her to his friends, or more than casually greet her on the streets. She knows that while he tells her—that his wife does not understand him, and that he is tired of her, yet that they are bound together by a thousand ties of mutual interest, and that just because a woman is a man's wife,

offer in return for them, she makes a losing bargain.

There are plenty of women who are foolish enough to make this mistake. They let their youth go by while they play about with some married man, and let him fill their heart so full that they have no place in it for the man they might have married. And in the end they are left disgruntled old maids, for when a married man gets tired of a woman and his fickle fancy is lured by some prettier face, he has always a perfectly good ready-made excuse for breaking with the old love. He can always have an acute stack of conscience that requires to have the old growth of affection removed.

Nor need any girl think that she can have a love affair with a married man without endangering her reputation. No matter how innocent and idealistic her affection may be, she will never be able to con-vince a scandal-loving world of it. For the world is worldly-wise and cynical. It knows that the man, who wins a young girl's heart, knowing that he is not free to offer-her honorable marriage, and who knowing that he is not free to offer-her honorable marriage, and whost takes her youth and her beauty for-his own selfish enjoyment, knowings that he is robbing her of all the rights of her girlhood, is no Sir-Galahad.
